## EXPERIENCE

### Senior Software Engineer, [Arintra](#), Bangalore

MARCH 2023 - CURRENT

Working on multiple projects using frontend technologies and server side environments like Nodejs. Creating application and dashboard solely from scratch using ReactJS, Redux, Axios, npm, NodeJS, Chartjs, LabelStudio, Reaflow, Material UI, Firebase services(Realtime database, Authentication, Cloud Firestore, hosting, etc), Styled components, and many more.

### SDE-II, [Rebel Foods](#), Bangalore

NOVEMBER 2021 - MARCH 2023

Handled frontend of the Spark (Kitchen inventory management) project with another frontend engineer in a team of total 21 engineers. Worked on the various features in the GRN workflow, store transfers management and Reports. I have extensively used ReactJS, axios, formik, npm among others during my tenure. I have also had the opportunity to work across multiple teams and interfaced with multiple stakeholders in the organization.

### Software Development Engineer, [Publicis Sapient](#), Bangalore

SEPTEMBER 2020 - OCTOBER 2021

Worked in the frontend team of 4. Worked on the marketing tool for an e-commerce product and created email templates and components for various email campaigns. I have worked on HTML CSS, vanilla Javascript, and multiple Adobe marketing tools.

### Front-end Consultant, [Door to Dumps](#), Gurgaon

APRIL 2020 - SEPTEMBER 2020

Being the sole frontend developer, built customer application and website on React js single handedly. Contributed in UX and product decisions as well at multiple places.

### Front-end Developer, [Nickelfox](#), Noida

MARCH 2018 - MARCH 2020

Worked in the frontend team of 5. Built several projects single-handedly using ReactJS and HTML/CSS. Collaborated across teams to deliver the best quality products for the clients.

### Front-end Developer, Freelancing

SEPTEMBER 2017 - FEBRUARY 2018

## PROJECTS

### [Coral](#)

Coral is a medical code curation, tracking, debugging, Analysis tool that helps doctors to add patient summary and medical coders to annotate the same. Coral automatically generates medical codes with the help of previously generated codes. During my tenure I have worked on multiple features like Analytics dashboard, patient summary annotation, Graphic charts and flowcharts.

## SKILLS

ReactJS

React Routers

Redux

JavaScript

HTML5

CSS3

MaterialUI

jQuery

Bootstrap

InfluxDB

Firebase

MobX

Liquid

GitHub

## Education

B. Tech

Information Technology(IT)

SEPTEMBER 2009 - JULY 2013

Poornima College of Engineering, Jaipur

## [Nebula](#)

Nebula is a tool to show the relation between multiple diseases, symptoms, tests required, type of disease, cause, effect. We have used Nodes and Edges structure to show the relations. Used Git APIs to store data in json format in individual branches. I have used Reaflow library to show complex flowcharts.

## [Spark](#)

Spark is an inventory management tool that helps cloud kitchen users to manage the kitchen inventory and handle the inwards and outwards of the stock with all types of costs. I have worked on multiple features like GRN, EOD count, Wastage control, Store transfer, Reports and Assets management.

## [Albertsons](#)

Albertsons is one of the largest food and drug retailers in the United States.

I have worked on various marketing campaigns like Monday Themes, cart abandonment, and transactional emails for their primary product and multiple subsidiaries like Safeway, Acme Market, Kings, Jewel-Osco etc.

## [Door to Dumps](#)

Door to Dumps is a solid waste management service, to improve municipal solid waste collection services, building efficient waste collection and segregation systems and add value to the existing system without replacing it.

I built the website and customer dashboard end to end from scratch as a Frontend Consultant using Reactjs, Redux and Formik.

## [Aptihealth](#)

Aptihealth is a behavioral healthcare company working in b2c space.

I worked on the consumer, doctor and internal application and developed features like onboarding, booking flow, video calling, scheduling using React/Redux, and integrated with the backend APIs.

## [Rating Finder](#)

This Extension for Netflix, displays IMDB's rating of movies on thumbnail image. Built the whole extension single handedly as a side project.

## [PoweredX](#)

PoweredX is a free program that allows entrepreneurs to get their tech-based ideas developed up to MVP level. I built the website end to end from scratch as a SPA using technologies HTML/CSS and Vanilla JS.

## [Aviteur](#)

Aviteur (a subsidiary of Gucci) is an e-commerce website specialising in luggage bags. I worked on the web application which was built using Liquid template language and Shopify.

## [Neobeema](#)

Neobeema aims to transform customer experiences in the insurance industry. I developed the whole web application from scratch using React and Vanilla JS.

## [Scoperworker](#)

Scoperworker is an enterprise B2B marketplace. I worked on various static and dynamic components across the website.

## [Nickelfox Portfolio and Blog](#)

Worked on the company website and blog and developed various pages and components using HTML/CSS, Vanilla JS and custom Wordpress theme.
